

LETTER OF INTENT

Samsung is using this platform very often during the trainings. In our opinion as a strong features should be mentioned:

1. Ease to manage laboratories (even by non-IT people).
2. Ease to training groups of employees remotely.
3. Big savings for training employees from different branches of the company.

We believe that further work on the intensifying this platform are highly recommended. Using CloudLabs on other visualization systems should increase using this platform in our daily work.

With regards,

Wojciech Z. Adamski
