

LETTER OF INTENT

We accepted with great interest information about joining Action Centrum Edukacyjne Sp. z o. o. to Horizon 2020 programme where Action is planning to multiply CloudLabs platform into other virtualization systems. Vistula University is using this platform during classes for students. We believe that further work on the intensifying this platform are highly recommended. In our opinion as a strong features should be mentioned:

1. The inaccessibility of many aspects of teaching in e-learning.
2. Possibility to learn and teach in real-company conditions without any difficulties with infrastructure.
3. Access to the same environment through a web page from anywhere (even from home).
4. No need to install additional software.
5. Possibility to control the uses of the environment by the teacher.
6. Teacher-student interactivity in the remote classroom (very important for e-learning classes).
7. The ability to transfer the laboratory in a given time with the additional possibility of limiting the number of working hours and specified resources.
8. Usage reporting.

We would like to inform that using CloudLabs on other visualization systems should increase using this platform in our daily work.

With regards,
